# FINAL KEYWORD

we can use final keyword with **class,method,variable.**

class k saath taki wo inherit naa ho.
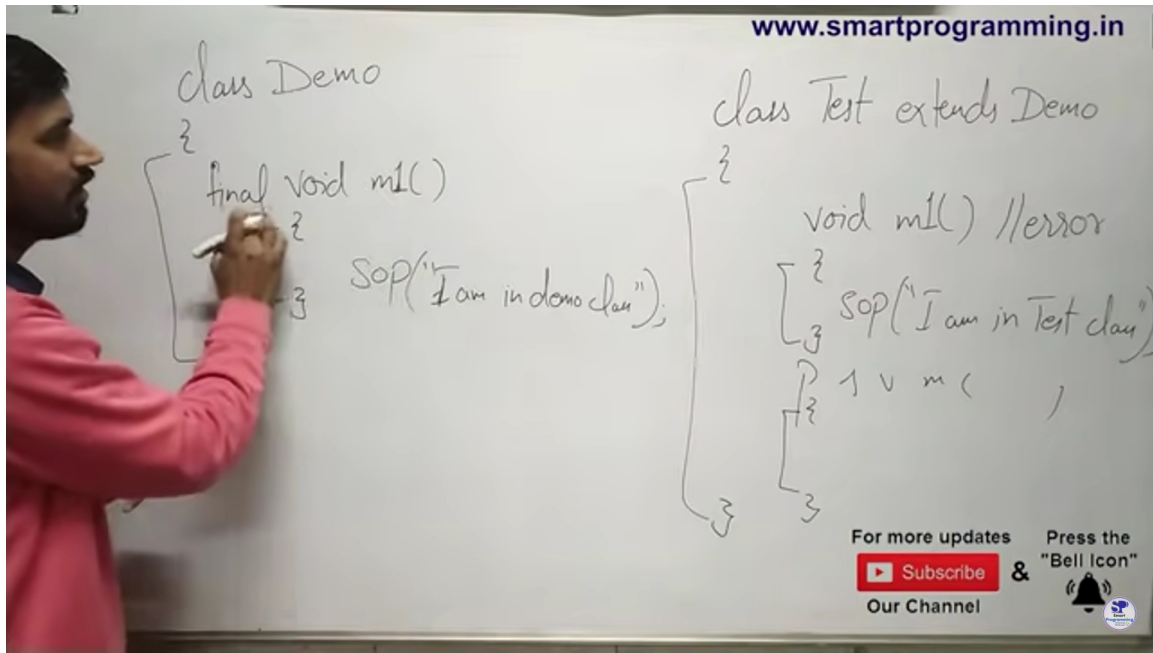

method ke saath taki wo override naa ho.

varible k saath taki value constant rhe.

FINAL VARIABLE

FINAL METHOD

```
class Demo
{
    final void m1()
    {
        SOP("I am in demo class");
    }
}

class Test extends Demo
{
    void m1()  //error
    {
        SOP("I am in Test class");
    }
    1 v m (     )
    {
    }
}
```

FINAL CLASS

```
final class D
{
    final vo
    {
    }
}

error// class Test extends Demo
{
    void m1()  //error
    {
        SOP("I am in Test class");
    }
    1 v m (     )
    {
    }
}
```
